

Industry	Mean	SD	P10	Median	P90
331 Wood products	24.1%	10.3%	12.3%	22.5%	38.2%
322 Wearing apparel	20.9%	4.1%	15.7%	20.9%	26.2%
369 Non-metallic minerals	11.3%	6.1%	6.3%	10.6%	16.6%
313 Beverages	25.2%	18.8%	9.3%	20.5%	45.6%
321 Textiles	17.2%	2.8%	13.6%	17.1%	20.8%

Overreporting ratio $x = e/M$: overreported materials as a share of true materials. Moments and quantiles of the density $f_x(y) = f_u(\ln(1 + y))/(1 + y)$, obtained by transforming the deconvolved density of $u = \ln(1 + e/M)$ (penalized B-spline deconvolution, unincorporated firms).
